Near-Term Forecast: 2024 and 2025

Both construction starts and the under-construction pipeline increased to close out 2023. As a result, the near-term forecast has been increased by 10.9% and 12.5% for 2024 and 2025, respectively.

For markets opened on or before 2020, there are currently 60.1 million net rentable square feet under construction. This represents an 8.3% increase quarter-over-quarter and an 11.3% increase year-over-year. Self storage construction completion times appear to be moderating. The year-end growth in the under-construction pipeline was primarily driven by increased new development.
