**Supply Moderates**

# SAN FRANCISCO MULTIFAMILY

## Rents Accelerate, Supply Winds Down

San Francisco's multifamily market entered full recovery mode in the spring leasing season, with most fundamentals improving. Average advertised asking rents were up 0.8%, on a trailing three-month basis through May, to an average of \$3,019, 50 basis points ahead of the U.S. figure. Year-over-year rents increased 4.5%, placing San Francisco at the top of the ranking among the 30 major metros tracked by Yardi Matrix and 430 basis points higher than the national average. Overall occupancy ticked up 20 basis points, to 95.9% as of April, while the national figure clocked in at 94.1%.

Year-over-year employment growth in San Francisco was 0.2% through February, 30 basis points ahead of the U.S. rate. This marked the beginning of a recovery after more than 17 months of contractions. Unemployment improved as well, at 3.9% in April, 40 basis points below the U.S. and up 20 basis points year-over-year, according to preliminary data from the Bureau of Labor Statistics. Several transit and infrastructure mega projects are ongoing in the Bay Area and will likely boost transit-oriented residential development in the coming decade. Among recent projects, the SFMTA board approved \$612 million for the Mission District bus-yard modernization.

Supply expansion returned to a more moderate pace. Year-to-date through May, developers added 832 units, with another 11,639 units under construction.

## RENT TRENDS

- San Francisco average advertised asking rents grew 0.8%, on a trailing three-month (T3) basis through May, to an average of \$3,019, 50 basis points ahead of the nation. Rent growth accelerated following the sluggish improvements recorded in the second half of 2025, with the spring leasing season in full swing, boosted by recovering job growth and stock expansion. Year-over-year, rents in San Francisco were up 4.5%, placing the metro at the top of the ranking among the 30 major metros tracked by Yardi Matrix, and ahead of the 0.2% national average.
- Advertisd asking rents for the upscale Lifestyle segment were up 0.9%, on a T3 basis through May, to \$3,474, while the rate for working-class Renter-by-Necessity properties inched up 0.7%, to \$2,676.
- The occupancy rate for stabilized assets ticked up 20 basis points year-over-year through April, to 95.9%, 180 basis points above the national average, even as nearly 18,000 units came on-line since 2024 across the metro. Lifestyle occupancy inched up 10 basis points, to 96.2%, while the RBN figure recorded a 20-basis-point uptick, to 95.6%.
- Submarkets in the San Francisco Peninsula led gains for year-over-year advertised asking rent growth. The top three were China Basin, where rates climbed 18.4%, to \$5,013, followed by NE San Francisco (12.8% to \$4,023) and Eastern San Francisco (12.5% to \$4,156). In the East Bay, growth was led by East Oakland/Oakland Hills (4.9% to \$2,789), Alameda (3.8% to \$3,073) and Dublin (3.5% to \$2,952).

## ECONOMIC SNAPSHOT

- San Francisco's employment growth clocked in at 0.2% year-over-year through February, 30 basis points ahead of the nation. This marked a 20-basis-point improvement over the previous month and the first uptick in overall job growth since at least September 2024. The metro's performance was sluggish last year, with the yearly rate down 1.0% throughout the first half and only slightly improving in the second.
- The metro's unemployment rate stood at 3.9% in April, 40 basis points below the U.S. average and up 20 basis points year-over-year, according to preliminary data from the BLS.
- San Francisco added 16,000 net jobs over the 12-month period ending in February, with only two sectors accounting for those gains. Education and health services added 19,900, while leisure and hospitality grew by 12,700 positions. Meanwhile, a combined 16,600 net loss was recorded across the remaining seven sectors, with manufacturing taking the biggest hit (-7,200).
- The SFMTA board approved the \$612 million Potrero Yard, a public-private partnership aiming to modernize the 100-year-old Mission District bus yard, which could boost transit-oriented development once complete in 2030-31. The project entails the construction of a four-story maintenance hub with a 246-bus capacity.

### San Francisco Employment Share by Sector

| Code | Employment Sector                   | Current Employment |         |
|------|-------------------------------------|--------------------|---------|
|      |                                     | (000)              | % Share |
| 65   | Education and Health Services       | 524.9              | 18.5%   |
| 70   | Leisure and Hospitality             | 308.7              | 10.9%   |

## Population

- San Francisco's population ticked down 0.2% from 2019 to 2022, losing 9,090 residents.
- The latest U.S. Census estimates point to the trend reversing, with a 1.1% projection between 2022 and 2024, trailing the 1.8% national figure.

### San Francisco vs. National Population

|               | 2019        | 2020        | 2021        | 2022        |
|---------------|-------------|-------------|-------------|-------------|
| National      | 324,697,795 | 326,569,308 | 329,725,481 | 331,097,593 |
| San Francisco | 4,701,332   | 4,709,220   | 4,725,584   | 4,692,242   |

## SUPPLY

- Developers had 11,639 units under construction as of May, along with an additional 140,000 units in the planning and permitting stages. Of the under-construction pipeline, 52.1% were units in Lifestyle projects, while 43.2% were in fully affordable developments. The share of fully affordable construction continues to grow across the metro and in May it was more than double the 17.1% national average.
- A total of 832 units came online across the metro year-to-date through May, which accounted for 0.3% of existing stock and was 40 basis points below the national figure. Completions decreased 74.5% compared to the same period last year, in line with national trends. Activity is projected to remain below the historical average this year, as only 4,560 units are expected to come online, nearly half of the 7,973-unit annual average recorded from 2018 to 2025.
- Developers broke ground on 1,830 units across 10 projects year-to-date through May, on par with the 1,458 units and 12 assets that work started on in the same period last year.
- Activity was concentrated across the Peninsula market, which had 8,384 units under construction in May, while the East Bay market con-

tained the remaining 3,255 units. Among the metro's submarkets, South San Francisco (1,841 units) and Redwood City (1,441) led activity in the Peninsula, while the top East Bay submarkets were San Ramon–West/Danville (456) and Downtown Oakland (415).

- Essex Property Trust's 543-unit development, dubbed Linden, in South San Francisco was the largest project underway in May. Completion is scheduled for 2027.

## TRANSACTIONS

- San Francisco investors traded \$509 million in multifamily assets year-to-date through May, nearly half of the \$958 million that was recorded in the same period last year, pointing to the holding pattern that investors find themselves in. A total of 14 assets changed hands. Four were Lifestyle properties and 10 were RBN. Last year was the third-best of the decade, with \$2.7 billion, surpassed by 2019 (\$3.9 billion) and 2021 (\$3.4 billion).
- The average price per unit was \$393,426 in May, down some \$5,000 from the figure recorded in 2025. The price gap between quality segments tightened somewhat, with RBN at \$376,986 and Lifestyle at \$458,429.
- Pacific Urban Investors paid \$170 million for Finch at Larkspur, a 342-unit asset in the Peninsula market. The sale marked the largest transaction in the first five months of the year. Catalyst Housing Group sold the property for \$497,514 per unit.

## Top 10 Markets for Self Storage Transactions in 2025

By Agota Felhazi

Single-asset self storage transactions topped \$2.6 billion in 2025, up from roughly \$2.4 billion in 2024, according to Yardi Matrix data. The average price per square foot rose 6.6% to \$117.01, while average deal size increased from \$4.9 million to more than \$5.9 million. The list excludes portfolio sales and facilities still in development. The top 10 metros accounted for 42.3% of national sales volume, up from 32.5% in 2024.

| Rank | Metro            | Total Square Feet Sold | Avg. Price Per Square Foot | Sales Volume (MM) |
|------|------------------|------------------------|----------------------------|-------------------|
| 1    | San Francisco    | 1,271,812              | \$208.9                    | \$211.5M          |
| 2    | New York Suburbs | 909,311                | \$174.2                    | \$129.2M          |
| 3    | Seattle          | 696,649                | \$181.3                    | \$118.7M          |
| 4    | Atlanta          | 1,151,869              | \$118.4                    | \$117.9M          |
| 5    | Miami            | 907,496                | \$143.7                    | \$113.6M          |
| 6    | Las Vegas        | 856,649                | \$122.8                    | \$105.2M          |
| 7    | Nashville        | 584,907                | \$172.4                    | \$100.8M          |
| 8    | Tampa            | 821,384                | \$141.0                    | \$93.8M           |
| 9    | Los Angeles      | 382,851                | \$151.7                    | \$58.1M           |
| 10   | Boston           | 375,602                | \$170.3                    | \$54M             |

### SAN FRANCISCO

San Francisco led the nation with nearly \$212 million in self storage sales, more than double 2024's volume and equal to 8.1% of national activity. Sixteen properties totaling 1.3 million square feet traded, while the average price rose 28.3% to \$208.85 per square foot.

A key deal was Ancora Group Holdings' \$47 million purchase of a Walnut Creek, Calif., Extra Space Storage facility.

## DEFINITIONS

**Lifestyle households (renters by choice)** have wealth sufficient to own but have chosen to rent. Discretionary households, most typically a retired couple or single professional, have chosen the flexibility associated with renting over the obligations of ownership.

**Renter-by-Necessity households** span a range. In descending order, household types can be:

- *A young-professional*, double-income-no-kids household with substantial income but without wealth needed to acquire a home or condominium;
- *Students*, who also span a range of income capability, extending from affluent to barely getting by;
- *Lower-middle-income ("gray-collar") households*, composed of office workers, policemen, firemen, technical workers, teachers, etc.;
- *Blue-collar households*, which barely meet rent demands each month and likely pay a disproportionate share of their income toward rent;
- *Subsidized households*, which pay a percentage of household income in rent, with the balance of rent paid through a governmental agency subsidy. Subsidized households, while typically low income, extend to middle-income households in some high-cost markets, such as New York City;
- *Military households*, subject to frequency of relocation.

These differences can weigh heavily in determining a property's ability to attract specific renter market segments. The five-star resort serves a very different market than the down-and-outer motel. Apartments are distinguished similarly, but distinctions are often not clearly definitive without investigation. The Yardi® Matrix Context rating eliminates that requirement, designating property market positions as:

| Market Position | Improvements Ratings |
|-----------------|----------------------|
| Discretionary   | A+ / A               |
| High Mid-Range  | A- / B+              |
| Low Mid-Range   | B / B-               |
| Workforce       | C+ / C / C- / D      |

The value in application of the Yardi® Matrix Context rating is that standardized data provides consistency; information is more meaningful because there is less uncertainty. The user can move faster and more efficiently, with more accurate end results.

The Yardi® Matrix Context rating is not intended as a final word concerning a property's status—either improvements or location. Rather, the result provides reasonable consistency for comparing one property with another through reference to a consistently applied standard.
